

Quad Shootout Folding Basketball Set

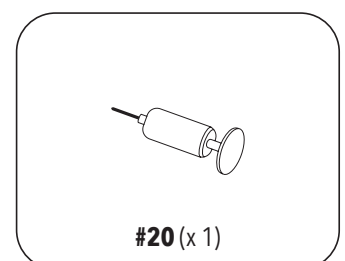

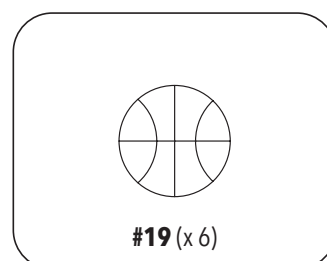

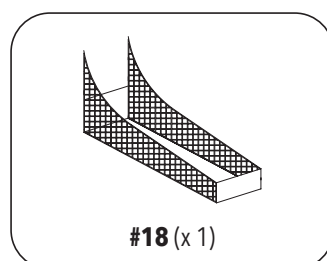

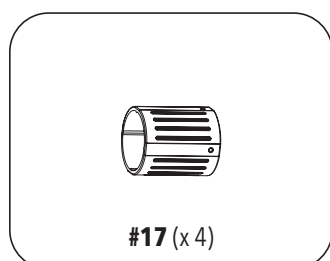

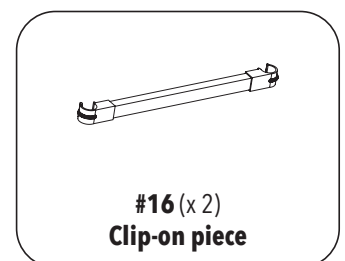

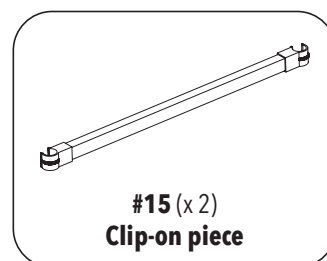

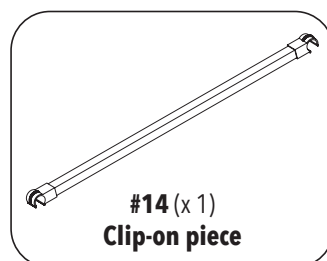

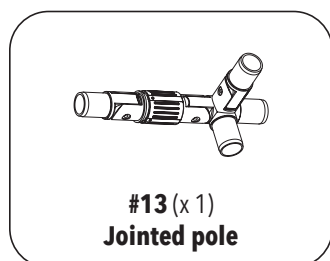

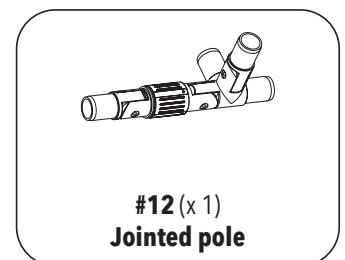

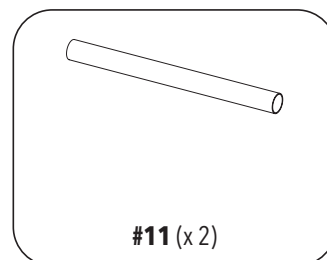

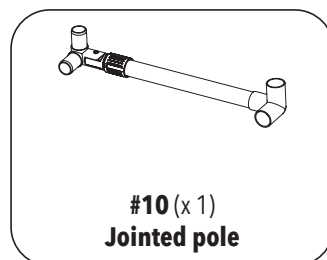

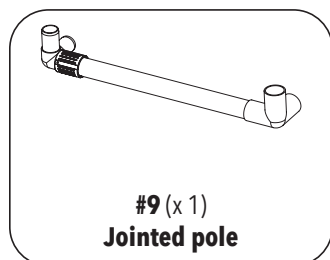

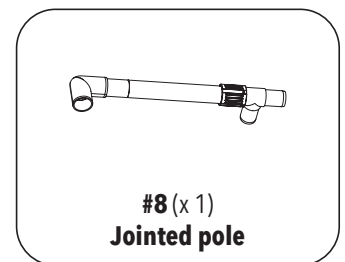

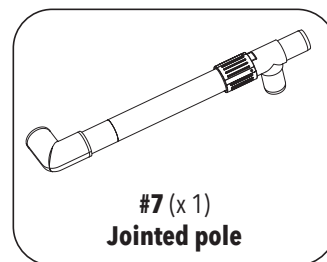

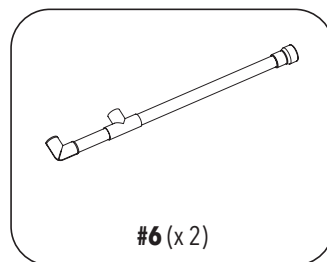

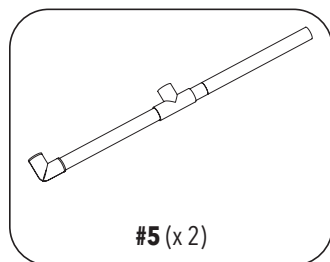

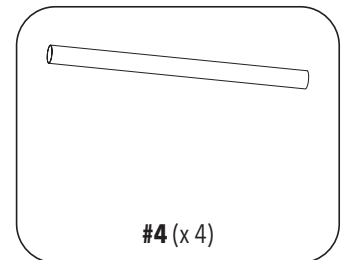

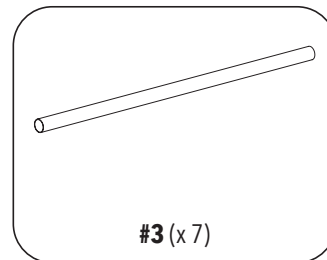

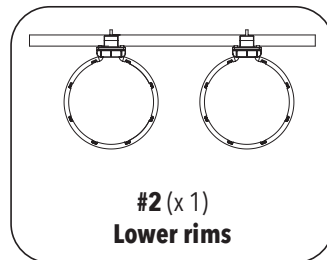

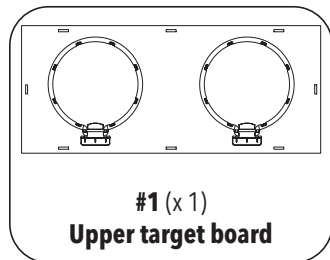

by *HearthSong*[®]

Safety and Assembly Instructions

#733537 | Ages 6+
Adult assembly required.
41"L x 31"W x 65"H
Takes 1 adult to assemble.

 **WARNING:**
CHOKING HAZARD—Small parts.
Not for children under 3 yrs.

Includes:

Note:

1. Find a clean, level surface to begin the assembly of your basketball stand.
2. Remove all of the contents from the box and check that you have all of the parts shown on the parts list before you begin assembly. Note: some parts may be pre-installed or pre-assembled.
3. Some figures or drawings may not look exactly like your product. Please read and understand the text before beginning each assembly step.
4. While assembling, please note any warning labels on the parts.
5. After or during the assembly, if you find the stand uneven or wobbly, please ensure that all the pipes and joints are secured tightly. You also can rotate the pipes a little to settle this problem.
6. When assembling clip-on parts **#14, 15, and 16**, make sure they are level.
7. The basketball stand is designed for indoor use.
8. Do not hang on the basketball stand.
9. Periodically inspect the basketball stand for any broken or excessively worn pieces. Do not use if you notice any damage.

Assembly:

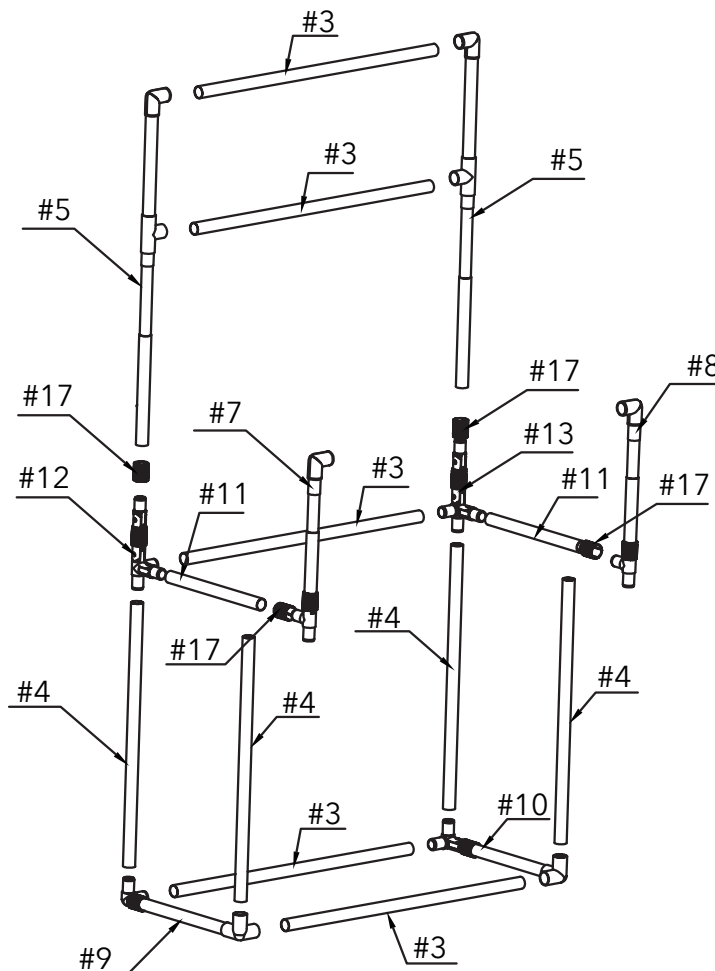

Watch the
assembly video at
HearthSong.com

Step A: Parts **#5**, **7**, and **8** may be adjusted for height. During initial assembly, extend the pipes to full position, and release the spring lock buttons to secure in place.

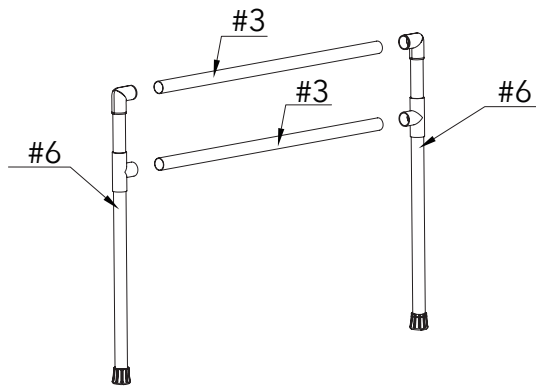

Step B: Assemble all the parts of rear supporting frame as shown in the figure below. Please note, the sleeves of part **#17** should be pre-assembled onto the pipe of parts **#5** and **11**. *Tip: Be sure to set up **#9** and **10** so that connectors are facing inwards as shown in image below.*

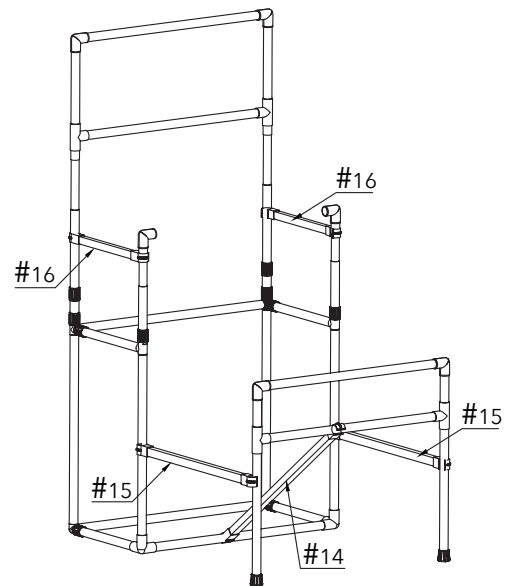

(continued on next page)

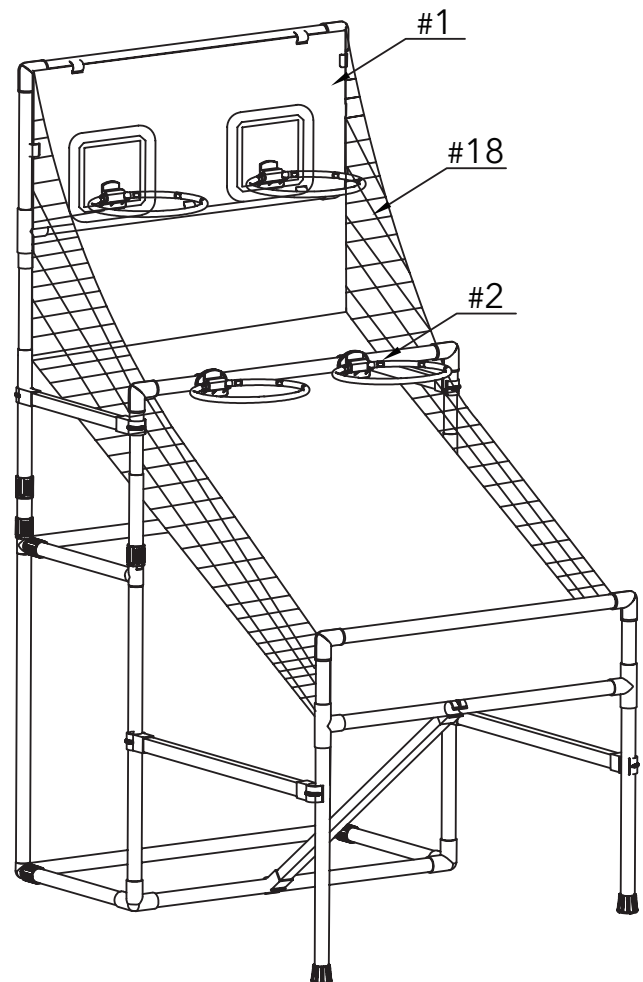

Step C: Assemble the front support frame as shown in the figure.

Step D: Join the front and rear supporting frames by carefully pressing the clip-on parts #14, 15, and 16 onto the poles of the frame as shown in the figure.

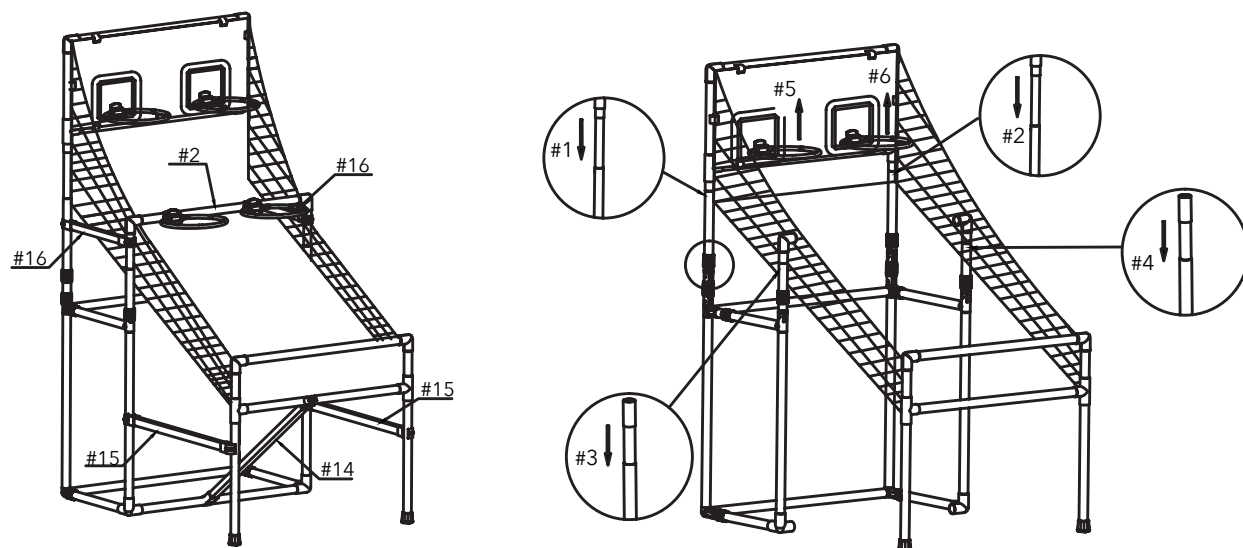

Step E: Using hook and loop strips, hang the net from the middle pole #3 and attach to the front poles #3. Attach the net to both sides of the frame. Attach to the top of the frame with one hook and loop strip. Next, attach lower rim #2 to parts #7 and 8, lining up the side with the push button to the hole in #7. Before attaching, it is helpful to slip the sides of the pole through the net. Finally, hang the target board using hook and loop strips.

Folding Steps:

Step 1: Remove the lower rim **#2** and all clip-on pieces **#14**, **15**, and **16** from the frame. Fold the upper baskets at a 90 degree angle to top. Adjust all spring lock buttons to the lowest position to collapse the pipes.

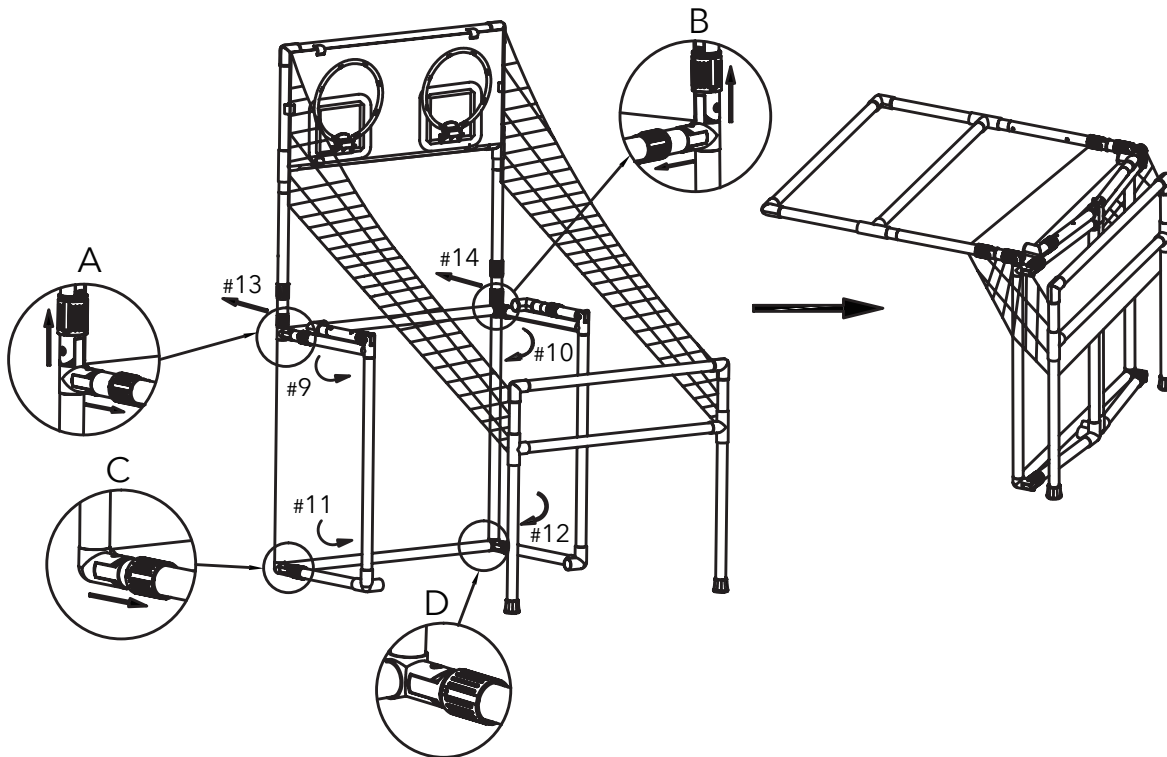

Step 2: Following the steps shown in the figure, pull the sleeves out from the joints (location of **#7** and **8**) and fold the pipes combo backward.

(continued on next page)

Step 3: Using the figure below for guidance, pull up on all joints and fold pipes as shown in the images.

Step 4: Lay the front frame flat against the rear frame. Pull the upper sleeves outwards from the joint (location of #15 and 16) and fold the pipes combo downwards at a 90 degree angle.
